

The Pantry Quality Statement

Throughout the years we have discovered that it is simply a better business philosophy to allow a certain amount of food to be prepared at any one given time during our regular hours of operation. We are well aware that at times, this may not sit well with someone trying to order food for an event or gathering; however, in order to maintain our standard of quality, with food being prepared with care & attention in a safe and clean environment – we have made the choice to take on less business with the intent of a higher quality product at the end. The ownership of The Pantry feels this is the moral & intelligent long - term business choice to keep the most people happy with good food.
